MODULE HANDBOOK

Module designation	Linear Algebra : Matrix Theory												
Code, if applicable	MMM 7205												
Subtitle, if applicable	-												
Courses	Linear Algebra : Matrix Theory												
Semester(s) in which the module is taught	1 st or 2 nd Semester												
Person responsible for the module	Head of Algebra Research Group												
Language	Bahasa Indonesia												
Relation to curriculum	Elective Course												
Teaching methods	Lecture, discussion, presentations, homework etc.												
Workload (incl. contact hours, self-study hours)	The total workload is 232 hours per semester, which consists of 50 minutes lectures per week, 120 minutes of structured activities per week, and 120 minutes of individual study per week, in total is 16 weeks per semester, including mid and final exams.												
Credit points in Credit Units	3												
Required and recommended prerequisites for joining the module	Students should have prior knowledge in linear algebra.												
Module objectives/intended learning outcomes	On successful completion of this course, students should be able to: CO 1 analyze various advanced concepts and techniques in matrix theory CO 2 utilize matrices as a tool to solve problems mathematics; CO 3 apply basic matrix techniques in various fields												
Content	Matrix analysis Matrices over Rings Generalized Inverse Matrices												
Examination forms	Oral presentation, essay.												
Study and examination requirements	The final mark will be computed from a proportional weight of assignments, mid examination and final examination. The final mark will be weighted as follows: <table border="1"> <thead> <tr> <th>No</th> <th>Assessment methods (components, activities)</th> <th>Weight (percentage)</th> </tr> </thead> <tbody> <tr> <td>1.</td> <td>Final Examination</td> <td>25-40%</td> </tr> <tr> <td>2.</td> <td>Mid-Term Examination</td> <td>25-40%</td> </tr> <tr> <td>3.</td> <td>Quiz/Presentation, Homework</td> <td>20-30%</td> </tr> </tbody> </table> To pass the course, the minimum grade is B	No	Assessment methods (components, activities)	Weight (percentage)	1.	Final Examination	25-40%	2.	Mid-Term Examination	25-40%	3.	Quiz/Presentation, Homework	20-30%
No	Assessment methods (components, activities)	Weight (percentage)											
1.	Final Examination	25-40%											
2.	Mid-Term Examination	25-40%											
3.	Quiz/Presentation, Homework	20-30%											
Media employed	White/Black Board, LCD Projector, Laptop/Computer, Zoom, E-Learning, Simaster												
Reading List	<ol style="list-style-type: none"> Nicholson, W.K., 2019, Linear Algebra with Applications, Base Textbook, Version 2019 – Revision A Zhang, F, 2011, Matrix Theory, Second Edition, Springer, Linear Park, Davie, Florida, USA Brown, W. C., 1984, Matrices Over Commutative Rings, Marcel Dekker, Inc. Laksov, D, 2013, Diagonalization of Matrices Over Rings, Journal of Algebra. 												

	<p>5. Zabavsky B., 2005, Diagonalizability theorems for matrices over rings with finite stable range, Algebra and Discrete Mathematics.</p> <p>6. Ara P., Goodearl K.R, O'meara K.C., and Pardo E., 1997, Diagonaliazation of matrices over regular rings, Linear Algebra and its Applications, Vol.265, pp-147-163.</p>

MODULE HANDBOOK

Module designation	Linear Algebra : Matrix Theory												
Code, if applicable	MMM 7205												
Subtitle, if applicable	Matrix Analysis												
Semester(s) in which the module is taught	1 st or 2 nd Semester												
Person responsible for the module	Head of Algebra Research Group												
Language	Bahasa Indonesia												
Relation to curriculum	Elective Course												
Teaching methods	Lecture, discussion, presentations, homework etc.												
Workload (incl. contact hours, self-study hours)	The total workload is 232 hours per semester, which consists of 50 minutes lectures per week, 120 minutes of structured activities per week, and 120 minutes of individual study per week, in total is 16 weeks per semester, including mid and final exams.												
Credit points in Credit Units	3												
Required and recommended prerequisites for joining the module	Students should have prior knowledge in linear algebra.												
Module objectives/intended learning outcomes	On successful completion of this course, students should be able to: CO 1 explain various advanced concepts and techniques in matrix theory CO 2 utilize matrices as a tool to solve problems mathematics; CO 3 apply basic matrix techniques in various fields such as mathematics, statistics, physics, computer science, and engineering, etc.												
Content	a. Partitioned Matrices: Elementary Operations of Partitioned Matrices, The Determinant and Inverse of Partitioned Matrices, The Rank of Product and Sum, The Eigenvalues of AB b. Matrix Functions c. Matrix Norms d. Matrix Decompositions: Schur Decomposition, Spectral Decomposition, Singular Value Decomposition, Polar Decomposition, Jordan Canonical Forms. e. Special Types of Matrices: Idempotent matrices, nilpotent matrices, involutory matrices, projection matrices, tridiagonal matrices, circulant matrices, Vandermonde matrices, Hadamard matrices, permutation matrices, doubly stochastic matrices, and nonnegative matrices.,												
Examination forms	Oral presentation, essay.												
Study and examination requirements	The final mark will be computed from a proportional weight of assignments, mid examination and final examination. The final mark will be weighted as follows: <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>No</th> <th>Assessment methods (components, activities)</th> <th>Weight (percentage)</th> </tr> </thead> <tbody> <tr> <td>1.</td> <td>Final Examination</td> <td>25-40%</td> </tr> <tr> <td>2.</td> <td>Mid-Term Examination</td> <td>25-40%</td> </tr> <tr> <td>3.</td> <td>Quiz/Presentation, Homework</td> <td>20-30%</td> </tr> </tbody> </table> To pass the course, the minimum grade is B	No	Assessment methods (components, activities)	Weight (percentage)	1. MODULE HANDBOOK

Module designation	Theory of Matrices
Code, if applicable	MMM 7205
Subtitle, if applicable	Generalized Inverse Matrices
Semester(s) in which the module is taught	1 st or 2 nd semester
Person responsible for the module	Head of Algebra Laboratory
Language	Bahasa Indonesia
Relation to curriculum	Elective course in the 1 st or 2 nd semester of doctor's degree
Teaching methods	Lecture, presentation, project
Workload (incl. contact hours, self-study hours)	Total workload is 232 hours per semester, which consists of 150 minutes lectures per week for 14 weeks, 180 minutes structured activities per week, 180 minutes individual study per week, in total is 16 weeks per semester, including mid exam and final exam.
Credit points in Credit Units	3
Required and recommended prerequisites for joining the module	Students master the concepts of algebraic structure theory and linear algebraic theory
Module objectives/intended learning outcomes	After taking this course, students will be able to: CO 1. construct a generalized inverse of a matrix CO 2. characterize the generalized Inverse matrices in research topics. CO 3. prove the spectral properties (properties related to eigenvalues and eigenvectors) of generalized inverse matrices. CO 4. make conjectures related to the application of generalized inverse matrices to solving linear systems from the dissertation topic

Content	Existence and construction of the generalized inverse of a matrix. Linear Systems and the Characterization of Generalized Inverses. Generalized Inverse Spectral. Generalized Inverse of the Partition matrix. Computational Aspects of Generalized Inverses. Applications of Generalized Inverses.												
Examination forms	Oral presentation, essay, paper												
Study and examination requirements	The final mark will be computed from a proportional weight of assignments, mid examination and final examination. The final mark will be weighted as follows: <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>No</th> <th>Assessment methods (components, activities)</th> <th>Weight (percentage)</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Final Examination</td> <td>20 - 30%</td> </tr> <tr> <td>2</td> <td>Mid-Term Examination</td> <td>20 - 30%</td> </tr> <tr> <td>3</td> <td>Class Activities: Quiz, Project, etc.</td> <td>50 - 60%</td> </tr> </tbody> </table> <p>To pass the course, the minimum grade is : B</p>	No	Assessment methods (components, activities)	Weight (percentage)	1	Final Examination	20 - 30%	2	Mid-Term Examination	20 - 30%	3	Class Activities: Quiz, Project, etc.	50 - 60%
No	Assessment methods (components, activities)	Weight (percentage)											
1	Final Examination	20 - 30%											
2	Mid-Term Examination	20 - 30%											
3	Class Activities: Quiz, Project, etc.	50 - 60%											
Media employed	Whiteboard, LCD screen, laptop, zoom
